

[ecbi Annual Report 2011/2012](#)

The 2011/12 ecbi Annual Report highlights our efforts over the past year to strengthen capacity and trust between North-South, and South-South positions in the emerging climate change regime. This is achieved through three programme areas: the trust-building Fellowship Programme with an informal (high-level) exchange of views and ideas; the Workshop Programme to enhance negotiating skills and capacity-building; and the Policy Analysis Programme to provide the policy analyses necessary for successful negotiations. Over the past 12 months, ecbi has hosted 11 workshops, seminars, ad hoc meetings worldwide with 276 participants from developing and developed countries. The feedback has been strong and progress demonstrated, particularly with regard of

climate finance. We look forward to the year ahead and the establishment of two new ecbi Circles: one on the Durban Platform and a second communications platform for the LDC Group.
